

Mineral Spirits Replacement

WHAT IT DOES:

Commonwealth Oil's **Mineral Spirits Replacement** (previous nomenclature Lo-Aro 109) is a typically 64° to 69°C flash solvent with very low aromatic solvent content. It is designed to remove grease, grime, dirt, and oil from virtually any surface.

WHERE TO USE IT:

Mineral Spirits Replacement works well on virtually any surface to quickly penetrate grim, grease, oil, and other contaminants for removal. It will work well in parts washers, circulating parts rinse baths, and degreasing applications. Mineral Spirits Replacement also works well on any soiled surface such as walls, or when cleaning dies. Never expose to sources of ignition. Use with adequate ventilation.

How to use it:

Mineral Spirits Replacement is used as received, direct from the container. The product is used neat and is not soluble or water extendible. Flood, dip, brush, roller, or spray can apply the product. Once the solvent has had a chance to loosen the soil, gently wipe with rags or a brush to remove excess soils. Parts can also be left to soak in the cleaner for especially stubborn soils. Wipe dry with a cloth or allow drying by evaporation in a rack.

PERFORMANCE BENEFITS:

Mineral Spirits Replacement has a slightly higher flash point than typical mineral spirits, and has a greatly reduced aromatic solvent content. This makes it a much safer product to use. This product can be used on virtually any surface. It penetrates most soils quickly for easy removal.

Mineral Spirits Replacement is combustible and should not be exposed to sparks, flames, or other sources of ignition. Never cut or weld on drums, even when empty. Fumes are heavier than air and will collect in confined spaces. Use with adequate ventilation.

TECHNICALLY SPEAKING:

Test	Mineral Spirits Replacement
Appearance	Clear
Odour	Solvent Odour
Flash Point, COC °C	> 64
Flash Point, COC °F	> 147.2
Density, lbs./US Gallon	6.26
Specific Gravity	0.750

These are typical figures and do not constitute a specification.

Handling & Safety Information

For information on the safe handling and use of this product, refer to the Material Safety Data Sheet obtainable from Commonwealth Oil Corporation.
