

## Commform™ Release Paste Concrete Form Release Paste

### WHAT IT DOES:

Commonwealth Oil's **Commform™ Release Paste** is a water-based concrete form release paste which has been specially formulated with a lubricity additive. **Commform™ Release Paste** replaces petroleum based grease as a release agent for hard to release areas using all types of forms. **Commform™ Release Paste** is non-staining and offers easy release. **Commform™ Release Paste** is easy to apply, non-hazardous and is compliant with reduced VOC limits legislation in Canada and the United States.

### WHERE TO USE IT:

**Commform™ Release Paste** can be applied to steel, plastic, fiberglass and overlaid plywood forms in precast applications using a brush, roller or similar type applicator. Due to the high viscosity of the paste, it may not work well when sprayed. The paste may be thinned with a small amount of water but must be mixed well. Rinses off with water.

**Directions for Use:** Form surfaces should be clean and free from contaminants to ensure optimum performance of the release agent. For best performance on formed concrete surfaces, apply liberally by using a brush or roller in areas where heavier release agents are required.

### PERFORMANCE BENEFITS:

**Commform™ Release Paste** offers the following benefits:

- Non-hazardous
- Minimizes bugholes
- Non-staining
- Produces excellent surface finishes
- Easy clean up with water
- Suitable for various precast and drycast concrete mixtures
- Low VOC content

## TECHNICALLY SPEAKING:

Test	Commform™ Release Paste
Viscosity	Thick paste
Colour	Off White
pH concentrate	10.0
VOC content (ASTM E1868-10) g/L	< 250
Density, lbs./US Gallon	8.26
Specific Gravity	0.990

These are typical figures and do not constitute a specification.

### Handling & Safety Information

For information on the safe handling and use of this product, refer to the Material Safety Data Sheet obtainable from Commonwealth Oil Corporation.
